

SPORTING EVENT

TRAFFIC PLAN

Detailed Traffic Plan:

It is anticipated that a significant number of fans attending this football fixture will arrive by bus and car. As a consequence of the environment layout outwith the stadium there will be no capacity for bus parking in the grounds of the stadium. Those attending by car will be expected to utilise the available parking in the town.

COACHES

Broad Street, Cowdenbeath has been identified for the purpose of bus-parking prior to the game, with buses entering Cowdenbeath via the A909 Bridge Street at its junction with the A92. The buses will be expected to drop-off their passengers at or near to the Chapel Street junction, allowing the fans to make their way to the ground on foot via Chapel Street.

The buses will then be directed west along the B981 Broad Street where they will turn at the entrance to the vacant factory unit to the north and then be parked in a static line on the north side of the road from a point just West of Mossie Road facing east. This is to facilitate a prompt and unhindered departure from the town at the conclusion of the game.

A Temporary Traffic Regulation Order will be in place for Broad Street on the 4th November and No Waiting cones will be placed along the length of the north side of Broad Street in advance of the game.

Two uniformed police officers will be in attendance to assist with the turning and parking of the buses on Broad Street.

A map of the area is attached.
